

Infant Room Guidelines

Dear Families:

The Early Learning Coalition of Lake County has recently issued the following guidelines in order to increase safety standards for babies in baby rooms. We kindly ask you to help us to adhere to these guidelines for the benefit of all the babies in our care:

1. Parents should provide at least two fitted Port-A-Crib sheets.
2. Burping cloths placed on the sheet will not be permitted.
3. Babies are no longer allowed to have blankets in the cribs. Instead of blankets, parents should provide warm clothing for nap times. Don't forget cozy socks for their feet! You may also provide a wearable blanket or sleep sack as the ones
4. A very young baby can have a blanket but they must be wrapped in the blanket. However, it would be better to provide a wearable blanket or sleep sack as the following

5. Toys are no longer allowed in cribs. Babies will be removed from the cribs as soon as they waken. They will then be allowed to have floor play and enjoy educational books and toys offered to them by the caregivers.

We thank you for your cooperation with these new guidelines.

Respectfully,

Ms. Lisbel, Director
